

Five-Minute Nature Play: Natural Stationery

We love all the different ways we can communicate!

In the same theme of writing messages on natural objects, try writing making your own homemade nature stationery.

There are several ways to do it -- find a beautiful flower or leaf or bit of tree bark (from the ground) and glue it to a sheet of heavy paper. Or, write your message directly on the leaf or a stick. If you're feeling very creative, fold a big leaf into an envelope!

You can use markers, paint, crayons, or even just your fingernail to leave an impression on the leaf, bark, or other object.
