Five-Minute Nature Play: Message Stones

Take some time this week to craft a message to your Mom, Dad, or someone else special to you. You can also write a general message or draw a picture for someone you don't know.

Looking for a fun gift idea? Take a walk around your neighborhood or local park and hunt for special stones that could serve as paperweights or little gifts. When you get home decorate them with permanent markers, crayons, or paint. It's a simple, eco-friendly way to tell people you care!

You can also drop or place the stones around your neighborhood for others to find. Next time you take a walk, look for message stones others have left.
